

Mema Roussopoulos

GRFP Recipient: 1995

Undergraduate Institution:
B.S. University of Maryland,
College Park

Graduate Institution:
Ph.D. Stanford University

Graduate Field of Study:
Computer Science

//

Current Position:
Assistant Professor of
Computer Science, University
of Athens, Greece

RESEARCH INTERESTS //

Mema Roussopoulos investigates advanced computer science topics such as distributed systems, networking, mobile computing, cyber security, cloud computing and digital preservation. In one of her projects, Roussopoulos is studying how to safely store digital data--both static and dynamic--in a way that is secure but not burdensome to access. In another project, Roussopoulos is studying how computing in “the cloud” or over a network can be more adaptable, faster and consume less energy.

AWARDS/ HONORS //

- Faculty Early Career Development (CAREER) Program Award, National Science Foundation (2004)
- Starting Grant, European Research Council (2011)

POSITION PROFILE //

Postdoctoral Fellow, Stanford University

Assistant Professor of Computer Science on the Gordon McKay Endowment, Harvard University

Associated Researcher, Institute of Computer Science at FORTH

Assistant Professor of Computer Science, Department of Computer Science, University of Crete

Assistant Professor of Computer Science, University of Athens, Greece
